## High Performance Relays

If you need a low signal relay capable of switching up to 6Ghz or enduring challenging environments such as extreme shock, vibration, or temperature, you should consider our CII high performance relays. There is an overview of our high performance relay product line in section 14 of this databook.

## Low Signal ( $<3 A$ ), PC Board Relay Question Tree

This guide helps the user select one or more relay series which may be appropriate for a given application. The user should then refer to detailed specifications elsewhere in this catalog to determine the actual part number to be specified. Of course, the user must assume ultimate responsibility for determining the suitability of a relay for a particular application.

## Features

- J WD has dual in-line package (DIP) configuration. (14-pin DIP)
- J WS has single in-line package (SIP) configuration.
- Low cost, dry reed reliability with various contact arrangements.
- Wave solderable and immersion cleanable.
- Optional coil suppression diode.

## Contact Data @ $\mathbf{2 5}^{\circ} \mathrm{C}$

Arrangements: 1 Form A (SPST - NO) on J WD \& WSS. 1 Form B (SPST - NC), 1 Form C (SPDT) and 2 Form A (DPST-NO) on J WD only.
Material: Ruthenium.
Expected Mechanical Life: 100 million operations.
Expected Electrical Life:

|  | Resistive Load | End of Life Criteria | No. of Operations |
| :--- | :---: | :---: | :---: |
| Forms A \& B | 20VDC, 500mA | 500 mV Loss | $1 \times 10^{6}$ |
|  | 20VDC, 250mA | 500 mV Loss | $20 \times 10^{6}$ |
|  | Low Level (5VDC, 1mA) | 50 Ohms | $100 \times 10^{6}$ |
| Form C | 12VDC, 500mA | 500 mV Loss | $1 \times 10^{6}$ |
|  | 10VDC, 10mA | 50 Ohms | $25 \times 10^{6}$ |
|  | Low Level (5VDC, 1mA) | 50 Ohms | $100 \times 10^{6}$ |

## Contact Ratings:

Maximum Switched Voltage: 100VDC for Forms A \& B; 28VDC for Form C.
Maximum Switched Current: 500 mA for all models.
Maximum Switched Power:10W for Forms A \& B; 3W for Form C. Initial Contact Resistance: 200 milliohms, max. at 10mA, 6VDC.

## Initial Dielectric Strength

Between Open Contacts: 250VDC for Forms A \& B; 175VDC for Form C. Between Contacts and Coil: 500VDC.

Initial Insulation resistance
Between Mutually Insulated Conductors: 1010 ohms at 100VDC.
Coil Data @ $25^{\circ} \mathrm{C}$
See Ordering Information table.
Operate Data @ $\mathbf{2 5}^{\circ} \mathrm{C}$
Operate Time (Including Bounce)t: 1.5 ms , max.
Release Time (Including Bounce)t: 0.5 ms , max., for Forms A \& B; 3.0 ms , max., for Form C.
$\dagger$ At or from Nominal Coil Voltage.

## Environmental Data

Temperature Range: $-35^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$.
Shock: 100 g , max., in three planes for $8 \mathrm{~ms}, 1 / 2$ wave pulse.
Vibration: 20 g , max., between 10 and $2,000 \mathrm{~Hz}$.

## Mechanical Data

Termination: Printed circuit terminals on 0.100 " ( 2.54 mm ) grid centers. Enclosure Type: Black molded epoxy package.
Weight: 0.08 oz . $(2.3 \mathrm{~g}$ ) approximately.

Users should thoroughly review the technical data before selecting a product part number. It is recommended that user also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

## Features

- Low cost, small package dry reed relay.
- 1 Form A and 2 Form A contact arrangements.
- Immersion cleanable, sealed version available. Consult factory.

## Contact Data @ $20^{\circ} \mathrm{C}$

Arrangements: 1 Form A (SPST-NO), 2 Form A (DPST-NO).
Material: Rh, Ru.
Max. Switching Rate: $300 \mathrm{ops} . / \mathrm{min}$. (no load).
30 ops./min. (rated load).
Expected Mechanical Life: 100 million operations (no load).
Expected Electrical Life: 1,000,000 operations (rated load).
Minimum Load: 1mA @ 1VDC.
Initial Contact Resistance: 150 milliohms @ 100mA, 6VDC.

## Contact Ratings

Ratings:
$100 \mu \mathrm{~A}$ @ 5VDC, 100,000,000 operations.
1mA @ 5VDC, 50,000,000 operations.

## Mercury-Wetted Reed Relays

Users should thoroughly review the technical data before selecting a product part number. It is recommended that users also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

## General Information

The mercury-wetted contact relay represents one of the more sophisticated types of relays made today. The early pioneer work in mercury-wetted contact switching dates back to the 1950's, as telephone laboratory scientists sought out the "perfect contact". Mercurywetted contacts represent the nearest thing to the perfect contact yet developed, being characterized by such parameters as: bounce-free operation; very low and stable contact resistance; hermetic protection; fast operating speeds; Form C or Form D contact, action contact life measured in billions of operations. The only major weakness of a mercurywetted contact relay is the necessity to mount the relay within $30^{\circ}$ of a vertical position, due to its position sensitivity.
While there are several variations of the mercury-wetted contact relay on the market, the basic contact element has essential concepts in common. The mercury-wetted contact element consists of a glass-encapsulated nickel-iron reed with its base immersed in a pool of mercury. The free reed cantilever projects upward between sets of stationary contact electrodes, which have been glass-sealed in proper juxtaposition at the top of the glass chamber. The mercury is induced to flow up the cantilever by capillary action, wetting mercury on both the cantilever contact tip as well as the stationary contacts. Thus a mercury-to-mercury contact is maintained on both the normally-closed and normally-open contacts, and the system is self-replenishing. The 2-ampere mercury-wetted capsule is shown far left.

Along with the inherent fast actuation of the capsule and excellent load-handling capacity, the mercury-wetted contacts exhibit extremely long life, as the mercury films reestablish at each closure and contact erosion is eliminated. Contact interface resistance is very low and stable, and as the mercury films are elastic, contact bounce is eliminated. A dynamic sequence of the mercury-wetted contact action is shown below.

While the below sequence portrays a Form D (make-before-break) contact action, a true Form C (break-before-make) contact can be provided by proper control of the mercury film dynamics and the contact electrode spacing.
The mercury-wetted contact capsules generally are mounted within a coil assembly, and with appropriately mounted bias magnets, mounting base and magnetic shielded enclosures. The more popular assemblies contain one or two capsules in a convenient printed circuit mounting module.
Mercury-wetted relays can be adjusted to operate with very low levels of input power, in the order of 10-20 milliwatts. Thus, power gain switching of as great as 10,000 can be realized. For all but very light contact loads, contact protection is required to limit the current or voltage rise time across the contacts.

## Form D Mercury-Wetted Contact Action As Seen In High-Speed Sequence

(1) Mercury (shown in black) covers armature and contact points; (2) and (3) as armature moves from open to closed position, mercury filament joins both contacts momentarily; (4) ruptured mercury surfaces accelerate away from each other, providing rapid breaking action; (5) as contact surfaces join, mercury wetting dampens rebound, eliminates electrical chatter, and provides contact reliability.

## SPDT (Form C or Form D) Contact Specifications

| Material | Rating (Switched Load) | (Carry Load) | Bridging and Transfer Time | Contact Resistance | Life Expectancy |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Mercury-wetted platinum contacts hermetically sealed in an inert atmosphere | 2 amperes maximum 500 volts maximum 100 VA maximum | 5 amperes maximum Not switched | When operated by a single DC pulse, the bridging or transfer time will be greater than 50 microseconds, but less than 500 microseconds. | 14 milliohms typical; 20 milliohms maximum Stable within $\pm 2$ milliohms throughout life. | 1 billion operations minimum at rated load |

## Mercury-Wetted Relays Contact Protection

The essentially infinite life of mercury-wetted contact relays may only be realized if the requirements for suitable contact protection are observed.
In that the goal is control of the rate of rise of voltage across the contacts when the circuit is opened (rather than peak transient limiting), the only suitable protection recognized is an RC network. Values of $R$ and $C$ may be calculated using the formula shown, or may be obtained from the direct reading nomograph.

## Nomograph Explanation

$1=$ Steady state current at time of circuit opening $\mathrm{E}=$ Open circuit voltage
Find I on the ordinate scale. Read C on the scale adjacent to I . R is found at the intersection of $I$ and $E$

To reduce voltage transient amplitudes, C may be increased up to 10 times calculated values. (R must be calculated value.)

For $1=0.5 \mathrm{amps}$ or less
and
$\mathrm{E}=50$ volts or less
R may be omitted
C must be calculated value

## Resistor Tolerances

| E | R |
| :---: | :---: |
| Less than 70 V | R up to 2 R |
| 70 V to 100 V | $\pm 50 \%$ |
| 100V to 150 V | $\pm 10 \%$ |
| Greater than 150 V | $\pm 5 \%$ |

159 series

## Mercury-Wetted Reed Relays

## Features

159 series relays are available in a Form C or Form D 2 amp contact arrangement, single or dual coil and printed circuit board terminals. Weight: 1.0 ounce
Positive potential applied to the start of the winding indicated by the symbol will close the contacts shown open on the electrical schematics. For reset of bistable relays, reversed polarity must be applied.

## Wiring Diagrams

## Outline Dimensions

Note: Relay must be mounted within $30^{\circ}$ of vertical and suitable contact protection must be used

## 160 series

## Mercury-Wetted <br> Reed Relays

7

## Features

160 series relays are available in a single Form C or Form D two ampere contact arrangement, single or dual coil and printed circuit board terminals.
The part numbers shown on the adjacent page are for relays with $0.093^{\prime \prime}$ terminal spacing. The part number designator for the 0.100 " grid is a 160 $3 X X X X X$ for a pin of $0.09^{\prime \prime}$ length, and $160-4 X X X X X$ for a pin of $0.125^{\prime \prime}$ length.
Positive potential applied to the start of the winding indicated by the symbol will close the contacts shown open on the electrical schematics. For reset of bistable relays, reversed polarity must be applied. Weight 0.5 ounces. UL File E55708
Note: Relay must be mounted within $30^{\circ}$ of vertical and suitable contact protection must be used.

## Features

- Surface and through-hole mounting types.
- 1 Form C contact arrangement.
- Latching or non-latching versions available.
- Switches loads from dry circuit to 1 amp.
- Washable - meets IEC protection class IP67.
- Low coil power requirement for IC compatibility.
- Terminals arranged on 0.1" grid.
- Designed for compact, high density mounting, $106.6 \mathrm{~mm}^{2}$ surface area.
- Ideal for data and communication systems.

## Contact Data @ $23^{\circ} \mathrm{C}$

Arrangements: 1 Form C (SPDT) bifurcated contacts.
Material \& Style:Palladium-Nickel with Gold-Rhodium overlay.
Expected Mechanical Life: 1 billion operations.
Expected Electrical Life: 50 million ops. at 10mA, 12VDC;
10 million ops. at $100 \mathrm{~mA}, 6 \mathrm{VDC}$;
100,000 ops. at 1A, 30VDC.
Contact Ratings:
Maximum Switched Voltage: 125VDC, 150VAC.
Maximum Switched Current: 1A.
Maximum Carrying Current: 1A.
Maximum Switched Power: 30W (DC), 60VA (AC).
Minimum Switched Capability: $100 \mu \mathrm{~V}$.
UL/CSA Contact Ratings: 1A @ 30VDC;
460mA @ 65VDC;
460mA @ 150VAC.
Initial Contact Resistance: 50 milliohms max. @ $10 \mathrm{~mA}, 20 \mathrm{mV}$.

## High Frequency Data

Capacitance: Between Open Contacts: 5pF, max.
Between Coil and Contacts: 6 pF , max.
RF Characteristics: Isolation at 100 / $900 \mathrm{MHz}:-30.9 \mathrm{db} /-18.0 \mathrm{db}$. Insertion loss at $100 / 900 \mathrm{MHz}:-0.12 \mathrm{db} /-1.9 \mathrm{db}$.
V. S. W. R. at $100 / 900 \mathrm{MHz}: 1.06 / 1.75$.

## Initial Dielectric Strength

Between Open Contacts: 500V rms for 1 minute.
Between Contacts and Coil: $1,500 \mathrm{~V}$ rms for 1 minute.
Surge Voltage Resistance per Bellcore TR-NWT-001089 (2/10 $\mu \mathrm{s}$ ):
Between Open Contacts: $2,000 \mathrm{~V}$ on request. Between Coil and Contacts: $2,500 \mathrm{~V}$.
Surge Voltage Resistance per FCC 68 ( $10 / 160 \mu \mathrm{~s}$ ): Between Open Contacts: $1,500 \mathrm{~V}$ on request. Between Coil and Contacts: $1,500 \mathrm{~V}$.

Note: Consult factory regarding availability of models meeting high surge resistance requirements between open contacts.

## Initial Insulation Resistance

Between Mutually Insulated Conductors: $10^{9}$ ohms @ 500VDC.

## Coil Data @ $\mathbf{2 3}^{\circ} \mathrm{C}$

Voltage: 1.5 to 24VDC.
Thermal Resistance at Continuous Thermal Load: $130^{\circ} \mathrm{K}$ per Watt.
Maximum Coil Temperature: $85^{\circ} \mathrm{C}$.
Duty Cycle: Continuous.

## V23026 (P1) series

## Miniature, Sealed PC Board Relay

(1) The specified voltages apply with only one coil energized.

## Operate Data @ $23^{\circ} \mathrm{C}$

Must Operate Voltage: 75\% of nominal voltage or less.
Must Release Voltage: 10\% of nominal voltage or less.
Max. Continuous Thermal Load : 500mW.
Operate Time (Excluding Bounce) t : 1 ms , typ.
Operate Bounce Timet: 1 ms , typ.
Release Time (Excluding Bounce)t: 0.4 ms , typ.
Set Time (Latching)t: 1 ms , typ.
Reset Time (Latching)t: 1 ms , typ.
Maximum Switching Rate: 200 operations/second.
$\dagger$ At or from Nominal Coil Voltage

## Environmental Data

Temperature Range: $-40^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$.
Vibration, Operational: $40 \mathrm{~g}, 10-200 \mathrm{~Hz} ; 20 \mathrm{~g}, 200-2000 \mathrm{~Hz}$.
Shock, Operational: 50 g at $11 \mathrm{~ms} 1 / 2$ sinusoidal impulse.
Resistance to Soldering Heat: $260^{\circ} \mathrm{C}$ for 10 s . Internal relay temperature should not exceed $210^{\circ} \mathrm{C}$.
Needle Flame Test: Application time 20s, burning time $<15$ s.

## Mechanical Data

Termination: Through-hole or surface mount printed circuit terminals.
Enclosure Type: Immersion cleanable, plastic sealed case.
Weight: 0.063 oz. ( 1.8 g ) approximately.

Wiring Diagrams (Bottom Views)
Single Coil Non-Latching \& Single Coil Latching

For non-latching versions, coil polarity must be observed.
For single coil latching versions, polarity shown results in "set" condition. Reverse polarity results in "reset" condition.
Diagram indicates de-energized position for non-latching and "reset" position for single coil latching.

## Dual Coil Latching

Diagram indicates relay in the "reset" position, with "reset" coil most recently energized as shown. Energizing "set" coil as shown will transfer the contacts.

## Features

- Gold clad contacts in a 1 Form C contact arrangement.
- Standard $0.1^{\prime \prime} \times 0.3^{\prime \prime}$ grid spacing in a DIP configuration.
- Standard or sensitive DC coils through 24 volts.
- High dielectric strength.
- Well suited for audio communications circuits, logic and process control, vending machines, thermostats and office automation applications.
- Immersion cleanable, plastic sealed case.
- Quiet operation for security applications.

Contact Data @ $\mathbf{2 0}^{\circ} \mathrm{C}$
Arrangements: 1 Form C (SPDT).
Material: Gold overlay silver-palladium alloy.
Ratings: $1 \mathrm{amp} @ 24 \mathrm{VDC}$, resistive; $0.5 \mathrm{amp} @ 120 \mathrm{VAC}$, resistive.
Max. Switching Current: 2A
Max. Switching Power: 60VA/24W.
Max. Switching Voltage: 120VAC/60VDC.
Expected Mechanical Life: 10 million operations.
Expected Electrical Life: 150,000 ops. @ 1A, 24VDC, resistive.
100,000 ops. @ 1A, 120VAC, resistive.
Initial Contact Resistance: 50 milliohms, max., @ 100mA, 6VDC.
Surge Voltage:
Between Coil and Contacts ( $10 \times 160 \mu \mathrm{~s}$ ): 1,500V: (FCC Part 68).

## Initial Dielectric Strength

Between Open Contacts: 500 V ms, $50 / 60 \mathrm{~Hz}$., for 1 minute.
Contact to Coil: $1,000 \mathrm{~V}$ rms, $50 / 60 \mathrm{~Hz}$., for 1 minute.

## Initial Insulation Resistance

Between Mutually Insulated Conductors: $10^{8}$ ohms @ $500 \mathrm{VDC}, 20^{\circ} \mathrm{C}$ and 65\% relative humidity.

## Coil Data @ $20^{\circ} \mathrm{C}$

Voltage: 3 through 24VDC.
Nom. Power (Approx.): Std. Coil: 450 mW; Sensitive Coil: 200 mW.
Maximum Power: Std. Coil: 800 mW .;Sensitive Coil: 640 mW .
Temperature Rise: Std. Coil: $105^{\circ} \mathrm{C}$ per watt, typ.
Sensitive Coil: $125^{\circ} \mathrm{C}$ per watt, typ.
Maximum Coil Temperature: $105^{\circ} \mathrm{C}$.
Duty Cycle: Continuous.

Max. Switched Power: 120VA, 30W.

## Initial Dielectric Strength

Between Open Contacts: $500 \mathrm{VAC} 50 / 60 \mathrm{~Hz}$. ( 1 minute).
Between Coil and Contacts: $1,000 \mathrm{VAC} 50 / 60 \mathrm{~Hz}$. (1 minute).
Surge Voltage Between Coil and Contacts: 1,500V FCC Part 68
( $10 / 160 \mu \mathrm{~s}$ ).

## Initial Insulation Resistance

Between Mutually Insulated Elements: 1,000M ohms min. @ 500VDCM.

## Coil Data

Voltage: 5 to 24VDC.
Nominal Power: OUAZ-D: 450 mW .
OUAZ-L: 200 mW .
Coil Temperature Rise: OUAZ-D: $60^{\circ} \mathrm{C}$ max., at rated coil voltage. OUAZ-L: $25^{\circ} \mathrm{C}$ max., at rated coil voltage.
Max. Coil Power: 130\% of nominal.
Duty Cycle: Continuous.

## OUAZ series

## Miniature, Sealed PC Board Relay

Telecommunications, Appliances, Office Machines, Audio Equipment.

吹 UL File No. E82292
(18) CSA File No. LR48471

Users should thoroughly review the technical data before selecting a product part number. It is recommended that user also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

Coil Data @ $20^{\circ} \mathrm{C}$

| OUAZ-D Standard |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Rated Coil <br> Voltage <br> (VDC) | Nominal <br> Current <br> (mA) | Coil <br> Resistance <br> (ohms) $\pm$ 10\% | Must Operate <br> Voltage <br> (VDC) | Must Release <br> Voltage <br> (VDC) |  |

| 12 | 37.5 | 320 <br> 24 | 18.8 | 1,280 |  |

## Operate Data

Must Operate Voltage: OUAZ-D: 70\% of nominal voltage or less.
OUAZ-L: 75\% of nominal voltage or less.
Must Release Voltage: OUAZ-D: 5\% of nominal voltage or more.
OUAZ-L: 10\% of nominal voltage or more.
Operate Time: OUAZ-D: 5 ms max.
OUAZ-L: 10 ms max.
Release Time: 7 ms max.

## Environmental Data

Temperature Range:
Operating: OUAZ-D: $-30^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}$
OUAZ-L: $-30^{\circ} \mathrm{C}$ to $+75^{\circ} \mathrm{C}$.
Vibration, Mechanical: 10 to $55 \mathrm{~Hz} ., 1.5 \mathrm{~mm}$ double amplitude Operational: 10 to 55 Hz ., 1.5 mm double amplitude.
Shock, Mechanical: $500 \mathrm{~m} / \mathrm{s}^{2}$ (50G approximately).
Operational: $100 \mathrm{~m} / \mathrm{s}^{2}$ (10G approximately).
Operating Humidity: 20 to 85\% RH. (Non-condensing)

## Mechanical Data

Termination: Printed circuit terminals.
Enclosure (94V-0 Flammability Ratings):
OUAZ-SS: Vented (Flux-tight), plastic cover.
OUAZ-SH: Sealed, plastic case.
Weight: $0.12 \mathrm{oz} .(3.5 \mathrm{~g})$ approximately.

## Operate Data @ 23${ }^{\circ} \mathrm{C}$

Operate and Release Voltage: See values in chart above.
Operate Time (at nominal voltage): 1 ms , typ.; 3 ms , max.
Reset Time [latching](at nominal voltage): 1 ms , typ.; 3 ms , max.
Release Time [non-latching](without diode in parallel): 1 ms , typ.; 3 ms ,

## max.

Release Time [non-latching](with diode in parallel): 3 ms , typ.; 5 ms , max.
Bounce Time (at contact close): 1 ms , typ.; 5 ms , max.
Maximum Switching Rate (no load): 50 operations/s.

## Environmental Data

Temperature Range: $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$.
Maximum Allowable Coil Temperature: $125^{\circ} \mathrm{C}$.
Thermal Resistance: <150K/W.
Shock, half sinus, 11 ms Functional: 50 g .
Shock, half sinus, 0.5 ms : Destructive: 500 g .
Vibration, $\mathbf{1 0 - 1 0 0 0} \mathrm{Hz}$.: Functional: 20 g .
Needle Flame Test: Application Time 20s.
Resistance to Soldering: $260^{\circ} \mathrm{C}$ for 10 s .

## Mechanical Data

Termination: Through-hole printed circuit terminals or gull-wing or J -leg surface mount printed circuit terminals.

## Mounting Position: Any.

Enclosure Type: Immersion cleanable (IP67) plastic case.
Weight: $0.03 \mathrm{oz} .(75 \mathrm{~g})$ approximately.
$U_{1}=\quad$ Minimum voltage at $23^{\circ} \mathrm{C}$ after pre-energizing with nominal voltage without contact current
$U_{\mathrm{II}}=\quad$ Maximum continous voltage at $23^{\circ}$

The operating voltage limits $U_{1}$ and $U_{\| 1}$ depend on
the temperature according to the formula:
$U_{1 \text { tamb }}=K_{1} \cdot U_{123^{\circ} \mathrm{C}}$
and
$U_{11 \text { tamb }}=K_{11} \cdot U_{\| 23^{\circ} \mathrm{C}}$
$t_{\mathrm{amb}} \quad=$ Ambient temperature
$U_{\text {Itamb }} \quad=$ Minimum voltage at ambient temperature, $\mathrm{t}_{\text {amb }}$
$U_{11}$ tamb $\quad=$ Maximum voltage at ambient temperature, $t_{\text {amb }}$
$k_{1}, k_{\|} \quad=$ Factors (dependent on temperature), see diagram

## Packaging Information

THT IM series relays are shipped in tubes of 50 . There are 1,000 relays in a full carton. SMT IM series relays are shipped in reels of 1,000 . There are 1,000 or 5,000 relays in a full carton.

## Ordering Information

See "Part Number" column in Coil Data chart on previous page for available base part numbers in the IM series.
For THT versions, add the suffix "TS" to the base part number.
For gull-wing SMT versions, add the suffix "GR" to the base part number.
For J -leg SMT versions, add the suffix 'J R" to the base part number.

Our authorized distributors are more likely to stock the following items for immediate delivery.

V23079 (P2) series

## Features

- Surface and through hole mounting types.
- Breakdown voltage between contacts and coil: $1,500 \mathrm{Vrms}$.
- Surge withstand between contacts and coil: 2,500V (Bellcore).
- High capacity contact: 2A @ 30VDC.
- 2 Form C contact arrangement.
- Board space saving, vertical mount ( $14.6 \times 7.2 \mathrm{~mm}$ surface area).
- Immersion cleanable, plastic sealed case.
- Single and dual coil latching versions available.
- Basic insulation (coil-to-contact) according to EN 60950 / UL 1950.
- Ultrasonic cleaning is not recommended.

## Contact Data @ $23^{\circ} \mathrm{C}$

Arrangement: 2 Form C (DPDT) bifurcated contacts.
Material: Gold overlay on silver nickel.
Rating:
Max. Switching Voltage: 250VAC, 220VDC.
Max. Switching Current: 5A.
Max Carrying Current: 2A.
Max Switching Power: 60W, DC; 62.5VA, AC.

Capacitance: Between Open Contacts: 2pF, max.
Between Coil and Contacts: 1.5 pF , max. Between Poles: 1pF, max.
RF Characteristics: Isolation at 100 / $\mathbf{9 0 0} \mathbf{~ M H z : ~}-39.0 \mathrm{db} /-20.7 \mathrm{db}$.
Insertion loss at 100 / $900 \mathrm{MHz}:-0.02 \mathrm{db} /-0.27 \mathrm{db}$.
V. S. W. R. at 100 / 900 MHz : 1.04 / 1.40 .

## Initial Dielectric Strength

Between Open Contacts: 1,000Vrms for 1 minute. ( $1,500 \mathrm{Vrms}$ on
request, consult factory for availability).
Between Coil and Contacts: $1,500 \mathrm{~V}$ rms for 1 minute. (single coil relay).
Between Poles: 1,000Vrms for 1 minute.
Surge Voltage Resistance per Bellcore TR-NWT-001089 (2/10 $\mu \mathrm{s}$ ):
Between Open Contacts: 2,000V.
Between Coil and Contacts: $2,500 \mathrm{~V}$ (single coil relay). Between Poles: 2,500V.
Surge Voltage Resistance per FCC 68 ( $10 / 160 \mu \mathrm{~s}$ ):
Between Open Contacts: 1,500V.
Between Coil and Contacts: 1,500V (single coil relay).
Between Poles: 1,500V.

## Initial Insulation Resistance

Between Mutually Insulated Conductors: $10^{9}$ ohms @ 500VDC.

| 12 | 9.0 | 26.1 | 13.8 | 1,029 $\pm 103$ |
| 24 | 18.0 | 52.3 | 27.7 | $4,114 \pm 411$ |
| Single Coil Latching, 70mW Nominal Power |  |  |  |  |
| 3 | 2.25 | 9.2 | 4.8 | $128 \pm 13$ |
| 4.5 | 3.375 | 13.8 | 7.3 | $289 \pm 29$ |
| 5 | 3.75 | 15.3 | 8.1 | $357 \pm 36$ |
| 6 | 4.5 | 18.5 | 9.8 | $514 \pm 51$ |
| 9 | 6.75 | 27.7 | 14.6 | 1,157 $\pm 116$ |
| 12 | 9.0 | 37.0 | 19.6 | 2,057 $\pm 206$ |
| 24 | 18.0 | 74.0 | 39.2 | $8,228 \pm 823$ |
| Dual Coil Latching, 140mW Nominal Power |  |  |  |  |
| 3 | 2.25 | 6.5 | - | $64.3 \pm 6$ |
| 4.5 | 3.375 | 9.8 | - | $145 \pm 15$ |
| 5 | 3.75 | 10.9 | - | $178 \pm 18$ |
| 6 | 4.5 | 13.0 | - | $257 \pm 26$ |
| 9 | 6.75 | 19.6 | - | $578 \pm 58$ |
| 12 | 9.0 | 26.1 | - | 1,029 $\pm 103$ |
| 24 | 18.0 | 52.3 | - | $4,114 \pm 411$ |

## Operate Data @ 23 ${ }^{\circ} \mathrm{C}$

Must Operate Voltage: 75\% of nominal or less.
Must Release Voltage: 10\% of nominal or more.
Operate Time (at nominal voltage): 3 ms , typ.; 5 ms , max.
Reset Time (at nominal voltage): 3 ms , typ.; 5 ms , max.
Release Time (non-latching w/o diode in parallel): 2 ms , typ.; 4 ms , max.
Release Time (non-latching with diode in parallel): 4 ms , typ.; 6 ms , max.
Bounce Time (at contact close): 1 ms , typ.; 3 ms , max.
Maximum Switching Rate (no load): 50 operations/s.

## Environmental Data

Temperature Range: $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$.
Maximum Allowable Coil Temperature: $110^{\circ} \mathrm{C}$.
Thermal Resistance: < 165K/W.
Shock, half sinus, 11 ms: Functional: 50g.
Shock, half sinus, 11 ms: Destructive: 150 g .
Vibration, $\mathbf{1 0 - 1 , 0 0 0 ~ H z . : ~ F u n c t i o n a l : ~ 3 5 g . ~}$
Needle Flame Test: Application time 20s, burning time $<15 \mathrm{~s}$.
Resistance to Soldering Heat: $260^{\circ} \mathrm{C}$ for 10 s .

## Mechanical Data

Termination: Through hole or surface mount printed circuit terminals.
Mounting Position: Any.
Enclosure: Immersion cleanable (IP67) plastic case.
Weight: . $084 \mathrm{oz} .(2.5 \mathrm{~g}$ ) approximately.

| Ordering Information |  | Typical Part Number $\downarrow$ | V23079 | A10 | 01 | B301 |

## Outline Dimensions

THT

Note: Mounting height varies dependent upon Termination type selected in step 2 of Ordering Information

## Coil Limits

$U_{1}=\quad$ Minimum voltage at $23^{\circ} \mathrm{C}$ after pre-energizing
$U_{\text {II }}=\quad$ Maximum continous voltage at $23^{\circ}$
The operating voltage limits $U_{1}$ and $U_{11}$ depend on the temperature according to the formula:
$U_{1 \text { tamb }}=K_{1} \cdot U_{123^{\circ} \mathrm{C}}$
and
$U_{11 \text { tamb }}=K_{11} \cdot U_{1123^{\circ} \mathrm{C}}$
$t_{\text {amb }}=$ Ambient temperature
$U_{\text {Itamb }}=$ Minimum voltage at ambient temperature, $\mathrm{t}_{\text {amb }}$
$U_{\text {It tamb }}=$ Maximum voltage at ambient temperature, $t_{\text {amb }}$
$k_{1}, k_{11}=$ Factors (dependent on temperature), see diagram

## Packaging Information

THT P2 relays are shipped in tubes of 50 . There are 2,000 relays in a carton. SMT P2 relays with long terminals are shipped in reels of 400, with 2,000 relays in a carton. SMT P2 relays with short terminals are shipped in reels of 500 . There are 2,500 relays in a full carton.

Wiring Diagrams (Bottom Views)
Single Coil Latching* and Single Coil Non-latching**

Dual Coil Latching***

Note: All diagrams shown in de-energized or reset position. *Note: For non-latching versions, coil polarity must be observed.
**Note: For single coil latching versions, polarity shown results in "set" condition. Reverse polarity results in "reset"condition.
***Note: The contact position illustrated shows the reset condition. If a positve potential is applied to terminal 1 or 7 , the relay adopts the set position.

PC Board Layout (Bottom View)

Recommended Soldering Conditions (according to CECC 00802)

Vapor Phase Soldering: Temperature/Time Profile (Lead Temperature)

Infrared Soldering: Temperature/Time Profile (Lead Temperature)

## Features

- Through hole PC board terminals.
- High-dielectric ( $>5,000 \mathrm{~V}$ contact-to-coil surge) version available.
- Meets Bellcore GR 1089 and FCC Part 68 and ITU-T K20.
- For applications in telecommunications, office automation, consumer electronics, medical equipment, measurement and control equipment.
- Immersion cleanable, plastic sealed case.
- Standard or sensitive coils for 3-48 VDC.
- Ultrasonic cleaning not recommended.

## Contact Data @ $\mathbf{2 3}^{\circ} \mathbf{C}$ (except as noted)

Arrangement: 2 Form C (DPDT) bifurcated contacts.
Material: Stationary: Silver-nickel, gold-covered or palladium-ruthenium, gold-covered
Contact Ratings: Silver-nickel Palladium-ruthenium
Max. Switched Current: 2A
1.25A 2A.
Max. Carry Current: (at max ambient temp.)
Max. Switched Voltage: 125VDC, 250VAC 220VDC, 250VAC.

## Operate Data @ $23^{\circ} \mathrm{C}$

Operate and Release Voltage: See values in chart above.
Operate Time (at nominal voltage): 3 ms , typ.; 4 ms , max.
Reset Time [latching](at nominal voltage): 3 ms , typ.; 4 ms , max.
Release Time [non-latching](w/o diode in parallel): 1 ms , typ.; 3 ms , max.
Release Time [non-latching](with diode in parallel): 3 ms , typ.; 4 ms , max.
Bounce Time (at contact close): 1 ms , typ.; 5 ms , max
Maximum Switching Rate (no load): 50 operations/s.

## Environmental Data

Temperature Range: $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$.
Maximum Allowable Coil Temperature: $110^{\circ} \mathrm{C}$.
Thermal Resistance: < 185K/W.
Shock, half sinus, 11 ms: Functional: 50g.
Shock, half sinus, 11 ms : Destructive: 1,500g.
Vibration, 10-500 Hz.: Functional: 20g.
Needle Flame Test: Application Time 20s.
Resistance to Soldering: $260^{\circ} \mathrm{C}$ for 10 s .

## Mechanical Data

Termination: Through-hole printed circuit terminals.
Mounting Position: Any.
Enclosure Type: Immersion cleanable (IP67) plastic case.
Weight: 0.10 oz . $(2.5 \mathrm{~g}$ ) approximately.
$U_{1}=\quad$ Minimum voltage at $23^{\circ} \mathrm{C}$ after pre-energizing with nominal voltage without contact current
$U_{\text {II }}=\quad$ Maximum continous voltage at $23^{\circ}$
The operating voltage limits $U_{1}$ and $U_{\| 1}$ depend on the temperature according to the formula:

| $U_{\text {Itamb }}=$ | $K_{1} \cdot U_{123^{\circ} \mathrm{C}}$ |
| :--- | :--- |
| and |  |
| $U_{\text {It tamb }}=$ | $\mathrm{K}_{11} \cdot U_{\text {II23 }} \mathrm{C}$ |
| $t_{\text {amb }}$ | $=$ Ambient temperature |
| $U_{\text {Itamb }}$ | $=$ Minimum voltage at ambient temperature, $\mathrm{t}_{\text {amb }}$ |
| $U_{\text {IIt tamb }}$ | $=$ Maximum voltage at ambient temperature, $\mathrm{t}_{\text {amb }}$ |
| $K_{1} K_{11}$ | $=$ Factors (dependent on temperature), see diagram |

## Ordering Information

See "Part Number" column in Coil Data chart on previous page for available part numbers in the FX2 series.

Packaging Information
FX2 series relays are shipped in tubes of 50 . There are 1,000 relays in a full carton.

## Our authorized distributors are more likely to stock the following items for immediate delivery.

None at present.

## Outline Dimensions

## Wiring Diagram (Bottom View)

## Non-Latching and Latching, Release or Reset Condition

$\overline{\text { PC Board Layout (Bottom View) }}$

## Features

- Standard DIP configuration mates with 16-pin socket.
- Meets FCC Part 68 ( $10 / 160 \mu \mathrm{~s}$ ).
- For applications in telecommunications, office automation, security
devices, measurement and control equipment.
- Immersion cleanable, plastic sealed case.
- Standard, high and ultra-sensitive coils.
- Ultrasonic cleaning not recommended.

## Contact Data @ $\mathbf{2 3}^{\circ} \mathrm{C}$

Arrangement: Bifurcated 2 Form C (DPDT) contacts.
Material: Stationary: Silver, gold clad.
Ratings: Max. Switched Current: 2A.
Max. Carry Current: 2A.
Max. Switched Voltage (at nom. voltage): 125VDC, 125VAC.
Max. Switched Power: 60W DC or 62.5VA AC.
Min. Switching Load: $10 \mu \mathrm{~A}, 10 \mathrm{mVDC}$.
Rated Load: 500mA at 125VAC.
Initial Contact Resistance: 50 milliohms.
Expected Mechanical Life: 15,000,000 ops at 36,000 ops/hr.

## Initial Dielectric Strength

Between Open Contacts: 750VAC $50 / 60 \mathrm{~Hz}$. for 1 minute.
Between Coil and Contacts: 1,000VAC $50 / 60 \mathrm{~Hz}$. for 1 minute.
Between Poles: 1,000VAC $50 / 60 \mathrm{~Hz}$. for 1 minute.
Surge Voltage Resistance per FCC 68 ( $10 / 160 \mu \mathrm{~s}$ ):
Between Open Contacts: 1,500V.
Between Coil and Contacts: $1,500 \mathrm{~V}$.
Between Poles: 1,500V.

## Initial Insulation Resistance

Between Contact and Coil: $10^{9}$ ohms or more @ 500VDC.

## Coil Data @ $\mathbf{2 3}^{\circ} \mathrm{C}$

## Voltage: 3 to 48VDC.

Nominal Power: 150 mW to 580 mW . See Coil Data table for details. Duty Cycle: Continuous.

## 190 series

## 2 Amp, DPDT, High Sensitivity, DIP PC Board Relay

## Operate Data @ 23${ }^{\circ}$ C

Operate and Release Voltage: See values in chart above.
Operate Time (at nominal voltage): 4 ms , typ.; 5 ms , max.
Release Time (without diode in parallel): 1 ms , typ.; 3 ms , max.
Release Time (with diode in parallel): 4 ms , typ.; 6 ms , max.
Bounce Time (at contact close): 1 ms , typ.; 5 ms , max.
Maximum Switching Rate (no load): 50 operations/s.

## Environmental Data

Temperature Range: $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$.
Maximum Allowable Coil Temperature: $125^{\circ} \mathrm{C}$.
Thermal Resistance: < 125K/W.
Shock, half sinus, 11 ms: Functional: 50g. Destructive: 100 g .
Vibration, $10-500 \mathrm{~Hz}$.: Functional: 10 g .
Needle Flame Test: Application Time 10s.
Resistance to Soldering: $260^{\circ} \mathrm{C}$ for 10 s .

## Mechanical Data

Termination: DIP compatible, printed circuit terminals.
Mounting Position: Any.
Enclosure Type: Immersion cleanable (IP67) plastic case.
Weight: 0.18 oz . ( 5 g ) approximately.
$U_{1}=\quad$ Minimum voltage at $23^{\circ} \mathrm{C}$ after pre-energizing
$U_{\text {II }}=\quad$ Maximum continous voltage at $23^{\circ}$

The operating voltage limits $U_{1}$ and $U_{\| 1}$ depend on the temperature according to the formula:
$U_{1 \text { tamb }}=K_{1} \cdot U_{123^{\circ} \mathrm{C}}$
and
$U_{\| l \text { tamb }}=\quad K_{\| l} \cdot U_{\| 23^{\circ} \mathrm{C}}$
$t_{\text {amb }} \quad=$ Ambient temperature
$U_{\text {Itamb }} \quad=$ Minimum voltage at ambient temperature, $\mathrm{t}_{\mathrm{amb}}$
$U_{\text {II tamb }} \quad=$ Maximum voltage at ambient temperature, $\mathrm{t}_{\mathrm{amb}}$
$k_{1}, k_{\mathrm{l}} \quad=$ Factors (dependent on temperature), see diagram

## Ordering Information

See "Part Number" column in Coil Data chart on previous page for available part numbers in the MT2 series.

## Packaging Information

MT2 series relays are shipped in tubes of 25 . There are 500 relays in a full carton.

Our authorized distributors are more likely to stock the following items for immediate delivery.
None at present.

## Outline Dimensions

Wiring Diagram (Bottom View)

## PC Board Layout (Bottom View)

## Features

- Through hole type terminals.
- Meets Bellcore GR 1089, FCC Part 68 and ITU-T K20.
- For applications in telecommunications, office automation, consumer electronics, medical equipment, measurement and control equipment.
- Immersion cleanable, plastic sealed case.
- 300mW coil.
- Ultrasonic cleaning not recommended.

## Contact Data @ $\mathbf{2 3}^{\circ} \mathbf{C}$ (except as noted)

Arrangement: 4 Form C (DPDT) bifurcatedcontacts.
Material: Stationary: Silver-nickel, gold covered.
Ratings: Max. Switched Current: 1.25A.
Max. Carry Current: 1.25A (at max ambient temperature.
Max. Switched Voltage: 150VDC, 150VAC.
Max. Switched Power: 30W DC or 62.5VA AC.
ULCSA Ratings: 400 mA @ $125 \mathrm{VAC} ; 1.25 \mathrm{~A} @ 24 \mathrm{VDC}$.
Initial Contact Resistance: $<70$ milliohms @ $10 \mathrm{~mA} / 20 \mathrm{mV}$.
Expected Mechanical Life: 100,000,000 ops.
Expected Electrical Life: 10 million operations @ $10 \mathrm{~mA} / 30 \mathrm{mVDC}$.
5 million operations @ cable load open end.
200,000 operations @ 1.25A / 24VDC, res.
200,000 operations @ 200mA / 150VDC, res.
Thermoelectric potential: $<10 \mu \mathrm{~V}$.

## High Frequency Data

Capacitance: Between Open Contacts: 2pF, max. Between Coil and Contacts: 4 pF , max. Between Poles: 2pF, max.
RF Characteristics: Isolation at 100 / $\mathbf{9 0 0} \mathbf{~ M H z : ~}-31.2 \mathrm{db} /-17.2 \mathrm{db}$. Insertion loss at 100 / $900 \mathrm{MHz}:-0.05 \mathrm{db} /-0.91 \mathrm{db}$. V. S. W. R. at 100 / 900 MHz : 1.03 / 1.31 .

## Initial Dielectric Strength

Between Open Contacts: 700Vrms for 1 minute.
Between Coil and Contacts: $1,800 \mathrm{Vrms}$ for 1 minute.
Between Poles: 700Vrms for 1 minute.
Surge Voltage Resistance per Bellcore TR-NWT-001089 (2/10 $\mu \mathrm{s}$ ),
FCC $68(10 / 160 \mu \mathrm{~s})$ and IEC ( $10 / 700 \mu \mathrm{~s})$ :
Between Open Contacts: 1,500V.
Between Coil and Contacts: $2,500 \mathrm{~V}$.
Between Poles: 1,500V.

## Initial Insulation Resistance

Between Contact and Coil: $10^{9}$ ohms or more @ 500 VDC.

Users should thoroughly review the technical data before selecting a product part number. It is recommended that users also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

## Coil Data @ $\mathbf{2 3}^{\circ} \mathrm{C}$

Voltage: 4.5 to 48VDC.
Nominal Power: See Coil Data table.
Duty Cycle: Continuous.
