

**New pin layout (LT type) added. Ultra high sensitivity realized at 50 mW nominal operating power**

## TX-S RELAYS

RoHS compliant

### FEATURES

#### 1. Nominal operating power:

##### High sensitivity of 50mW

By using the highly efficient polar magnetic circuit "seesaw balance mechanism", a nominal operating power of 50 mW (minimum operating power of 32 mW) has been achieved.

#### 2. Compact size

15.0(L) × 7.4(W) × 8.2(H) .591(L) × .291(W) × .323(H)

#### 3. High contact reliability

High contact reliability is achieved by the use of gold-clad twin crossbar contacts, low-gas formation materials, mold sealing the coil section, and by controlling organic gas in the coil.

**\*We also offer a range of products with AgPd contacts suitable for use in low level load analog circuits (Max. 10V DC 10 mA).**

#### 4. Outstanding surge resistance.

Surge breakdown voltage between open contacts:

1,500 V 10×160 μsec. (FCC part 68)

Surge breakdown voltage between contact and coil:

2,500 V 2×10 μsec. (Telcordia)

#### 5. Low thermal electromotive force (approx. 0.3 μV)

The structure of the mold-sealed body block of the coil section achieves nominal operating power of 50 mW and high sensitivity, along with low thermal electromotive force, reduced to approximately 0.3 μV.

#### 6. A range of surface-mount types is also available.

SA: Low-profile surface-mount terminal type

SS: Space saving surface-mount terminal type

#### 7. Sealed construction allows automatic washing.

### TYPICAL APPLICATIONS
