

DESCRIPTION

This surface mount series of industry recognized voidless-hermetically-sealed Bidirectional Transient Voltage Suppressor (TVS) designs is military qualified to MIL-PRF-19500/516 and are ideal for high-reliability applications where a failure cannot be tolerated. They provide a Working Peak "Standoff" Voltage selection from 5.2 to 152 Volts with two package sizes for 500 W and 1500 W ratings. They are very robust in hard-glass construction and also use an internal metallurgical bond identified as Category I for high-reliability applications. Both of these are also military qualified to MIL-PRF-19500/516 and are available as both a non suffix part and an "A" suffix part involving different voltage tolerances as further described in note 4 on page 2. These devices are also available in axial-leaded packages for thru-hole mounting by deleting the "US" suffix (see separate data sheet for 1N6102 thru 1N6173A). Microsemi also offers numerous other TVS products to meet higher and lower peak pulse power and voltage ratings in both through-hole and surface-mount packages.

IMPORTANT: For the most current data, consult MICROSEMI's website: <http://www.microsemi.com>

APPEARANCE

**Package "E"
(or "D-5B")**

**Package "G"
(or "D-5C")**

FEATURES

- High surge current and peak pulse power provides transient voltage protection for sensitive circuits
- Triple-layer passivation
- Internal "Category I" metallurgical bonds
- Voidless hermetically sealed glass package
- JAN/TX/TXV military qualifications available per MIL-PRF-19500/516 by adding JAN, JANTX, or JANTXV prefix (consult factory for 1N6102US and 1N6138US)
- JANS available for 1N6103AUS thru 1N6118AUS per MIL-PRF-19500/516 as well as further options for screening in accordance with MIL-PRF-19500 for JANS on all others in this series by using a "MSP" prefix, e.g. MSP6119AUS, MSP6143AUS, etc.
- Axial-leaded equivalents also available (see separate data sheet for 1N6102 thru 1N6173)

APPLICATIONS / BENEFITS

- Military and other high reliability transient protection
- Extremely robust construction
- Extensive range in Working Peak "Standoff" Voltage (V_{WM}) from 5.2 to 152 V
- Available as either 500 W or 1500 W Peak Pulse Power (P_{PP}) using two different size packages
- ESD and EFT protection per IEC6100-4-2 and IEC61000-4-4 respectively
- Secondary lightning protection per select levels in IEC61000-4-5
- Square-end-cap terminals for easy placement
- Nonsensitive to ESD per MIL-STD-750 Method 1020
- Inherently radiation hard as described in Microsemi MicroNote 050

MAXIMUM RATINGS

- Operating (T_J) & Storage Temperature: -55°C to $+175^{\circ}\text{C}$
- Peak Pulse Power (P_{PP}) at 25°C : 500 W for 1N6102US to 1N6137AUS and 1500 W for 1N6138US to 1N6173AUS @ 10/1000 μs (also see Figures 1,2 and 3)
- Impulse repetition rate (duty factor): 0.01%
- Steady-State Power: 3.0 W for 1N6102US to 1N6137AUS and 5.0 W for 1N6138US to 1N6173AUS up to $T_{EC} = 150^{\circ}\text{C}$. Linearly derate above $T_{EC} = 150^{\circ}\text{C}$ to zero at $T_{EC} = 175^{\circ}\text{C}$.
- Steady-State Power: 2.0 W for 1N6102US to 1N6137AUS and 3.0 W for 1N6138US to 1N6173AUS @ $T_A = 25^{\circ}\text{C}$ (see note and Figure 4 for linear derating at higher temperatures)
- Thermal Resistance (junction to endcap): 8.3°C/W for 1N6102US to 1N6137AUS and 5.0°C/W for 1N6138US to 1N6173AUS
- Solder Temperatures: 260°C for 10 s (maximum)

MECHANICAL AND PACKAGING

- CASE: Hermetically sealed voidless hard glass with Tungsten slugs
- TERMINATIONS: End caps are Copper with Tin/Lead (Sn/Pb) finish. Note Previous inventory had solid Silver (Ag) with Tin/Lead (Sn/Pb) finish.
- MARKING: None
- POLARITY: No polarity marking for these bidirectional TVSs
- Tape & Reel option: Standard per EIA-481-B
- Weight: 539 mg for 500 Watt (E Package)
1100 mg for 1500 Watt (G Package)
- See package dimensions and recommended pad layouts on last page for both the "E" (D-5B) and "G" (D-5C) size packages

NOTE: Steady-state power ratings with reference to ambient are for PC boards where thermal resistance from mounting point to ambient is sufficiently controlled where T_{OP} or $T_{J(MAX)}$ is not exceeded

Note: 4		1	1	1	2	3	1	2	3	1

- Notes:**
1. Applies to both 500W and 1500W series for devices shown (see note 4)
 2. Applies only to 500W series (1N6102US thru 1N6137US)
 3. Applies only to 1500W series (1N6138US thru 1N6173AUS)
 4. Part number without the A suffix has 5% higher V_C , 5% lower minimum $V_{(BR)}$, and 5% lower I_{PP} .

SYMBOLS & DEFINITIONS

Symbol	Definition
V_{BR}	Minimum Breakdown Voltage: The minimum voltage the device will exhibit at a specified current.
V_{WM}	Working Peak Voltage: The maximum peak voltage that can be applied over the operating temperature range. This is also referred to as Standoff Voltage.
I_D	Maximum Standoff Current: The maximum current that will flow at the specified voltage and temperature.
V_C	Maximum clamping voltage at specified I_{PP} (Peak Pulse Current) at the specified pulse conditions.
P_{PP}	Peak Pulse Power: The peak power dissipation resulting from the peak impulse current I_{PP} .

PACKAGE DIMENSIONS and PAD LAYOUTS

NOTE: DIMENSIONS IN INCHES [MM]

**E-MELF-PKG (D-5B)
for 1N6102US thru 1N6137AUS (500 W)**

Note: If mounting requires adhesive separate from the solder, an additional 0.080 inch diameter contact may be placed in the center between the pads as an optional spot for cement as shown in the pad layout.

PACKAGE DIMENSIONS and PAD LAYOUTS

NOTE: DIMENSIONS IN INCHES [MM]

G-MELF-PKG (D-5C)
for 1N6138US thru 1N6173AUS (1500 W)

Note: If mounting requires adhesive separate from the solder, an additional 0.090 inch diameter contact may be placed in the center between the pads as an optional spot for cement as shown in the pad layout.
