

17<sup>th</sup> December 2008

To: Valued Customers

From: Littelfuse Product Management

Subject: Change of the 13" Reel dimension of Tape and Reel packing of Telelink fuse 461 series, Enhanced Telelink 461E series and Omni-Blok 154 series

Thank you for using Littelfuse products.

As a result of consolidation of suppliers, the supplier of the 13" reel for Tape and Reel packing of the Telelink fuse and Omni-Blok is going to be changed from current supplier Advantek to a new supplier U-Pak. Please note that the reels from Advantek and U-Pak are not exactly identical and therefore the drawing of the reel needs to be updated accordingly.

All current ratings of the following product series are affected :  
0461xxx, 04611.25EER, 0154xxx

Please refer to the attached documents for the comparison of the current and new reel dimensions and drawing of the new U-Pak reel.

### **Timeframe**

The effective date of this change is 18<sup>th</sup> February 2009. Hence customers are expected to start to receive products packed with the U-Pak reels after the effective date once the inventory of the Advantek reel is depleted.

Samples of Reel for evaluations are available upon request. Please contact your local Littelfuse Sales Office.

Best regards,

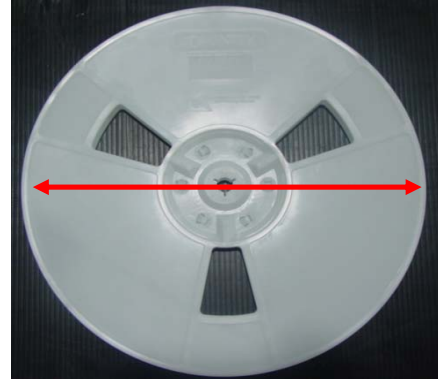

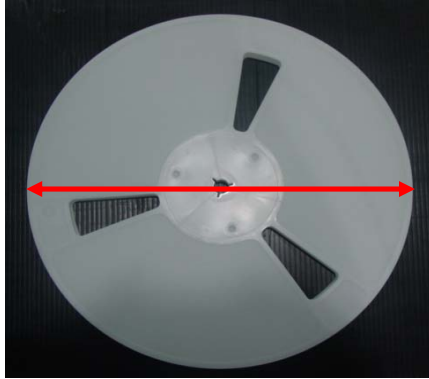

KK Wu
