## ON SEMICONDUCTOR STANDARD POLICIES & DISCLAIMERS

ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation consequential or incidental damages.

“Typical” parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including “Typicals” must be validated for each customer application by customer’s technical experts.

ON Semiconductor does not convey any license under its patent rights nor the rights of others.

ON Semiconductor and  are registered trademarks of ON Semiconductor, Inc. ON Semiconductor, Inc. is an Equal Opportunity/Affirmative Action Employer.

### ON SEMICONDUCTOR PRODUCT SAFETY POLICY

#### OEM POLICY

ON Semiconductor products are not designed, intended, nor authorized for use as components in systems intended for surgical implant into the body, or in other applications intended to support or sustain life, or in any other application in which the failure of the ON Semiconductor product could create a situation where personal injury or death may occur. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify\* and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the product.

#### DISTRIBUTOR POLICY

ON Semiconductor products are not designed, intended, nor authorized for use as components in systems intended for surgical implant into the body, or in other applications intended to support or sustain life, or in any other application in which the failure of the ON Semiconductor product could create a situation where personal injury or death may occur.

ON Semiconductor periodically may inform Distributor that certain customers have sought and been denied permission to purchase certain ON Semiconductor products for such uses directly from ON Semiconductor. Distributor agrees, upon being so informed, to take reasonable action to prevent sales of the ON Semiconductor products in question for such uses to any such identified customers.

Distributor further agrees, before any sale of ON Semiconductor products made with actual knowledge that the customer is purchasing for such use, to inform ON Semiconductor of the potential sale. In the event ON Semiconductor, in its sole discretion, determines that it does not want its product sold for such use, Distributor agrees that it will not sell the product or any substitute ON Semiconductor products to the customer for such use.

If Distributor makes the sale despite ON Semiconductor’s instruction to the contrary, Distributor agrees to indemnify\* and hold ON Semiconductor, and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the product.

\* NOTE: A copy of the standard ON Semiconductor indemnity form is on the following page.

# INDEMNIFICATION FORM

ON Semiconductor, Inc. ("ON Semiconductor"), and \_\_\_\_\_ ("Customer") hereby agree to the following in regard to all purchases of ON Semiconductor semiconductor products by customer from whatever source:

1. Customer hereby agrees to indemnify, defend, and hold harmless ON Semiconductor, and all of its officers, directors, subsidiaries, affiliates, agents, and/or employees (the "Indemnitees"), from and against any and all claims, demands, judgments, and lawsuits for personal injury or death or property damage arising out of or associated in any manner with the incorporation in any of Customer's devices, systems, or products of a device, die, component, part, or assembly ("Products") manufactured and/or sold by ON Semiconductor or any of its subsidiaries, affiliates, or distributors, and any and all losses, costs, damages, and expenses (including reasonable attorneys' fees) incurred by the Indemnitees or any of them in connection with such a claim, demand, judgment, or lawsuit; provided, however, that:
  - (a) Customer is provided with prompt notice after ON Semiconductor learns of any such claim, demand, or lawsuit;
  - (b) The Indemnitees cooperate fully with Customer in the defense of such claim, demand, or lawsuit; and
  - (c) Customer has the exclusive control over the defense and settlement of any such claim, demand, or lawsuit.
  
2. The foregoing indemnity is agreed by the parties hereto to apply to any and all claims of whatever nature against the Indemnitees, including expressly, but not limited to, claims that any of the Indemnitees were negligent, jointly or collectively, whether actively or passively, regarding any acts or omissions in connection with the design, manufacture, and/or sale of ON Semiconductor's Semiconductor Products, or claims that ON Semiconductor's Semiconductor Products were defective or dangerous in design or manufacture or would otherwise subject any of the Indemnitees to liability on any strict liability theory, **except only claims arising from ON Semiconductor's willful misconduct.**

**IN WITNESS WHEREOF**, the parties hereto have caused their duly authorized officers to execute this Indemnity as of the date indicated.

## **PRICING AND ORDERING INFORMATION**

### **PRICING POLICY**

All prices listed herein are in U.S. dollars. These prices supersede all previously issued prices and are subject to change or withdrawal without notice.

### **MINIMUM ORDER REQUIREMENTS**

- All orders placed directly with ON Semiconductor must be in multiples of the "Factory Order Increment" quantity specified for that device. Orders placed with ON Semiconductor authorized distributors should be in multiples of the "Suggested Resale" column quantity to minimize handling-induced quality problems and administrative errors.
- The minimum acceptable line item (scheduled release) for orders placed on ON Semiconductor is \$300 in multiples of the "Factory Order Increment" quantity, unless otherwise noted.

Note: These minimums do not apply to literature, samples or evaluation boards.

### **CHANGE ORDER & CANCELLATION REQUIREMENTS**

- Thirty-five (35) days' notice, prior to the ON Semiconductor MSD (ON Semiconductor Manufacturer's Schedule Date), is required for all standard commercial price book device order changes and/or cancellations. The starting date is the date of formal notification to the appropriate ON Semiconductor order entry location.

Note: Specials, non-book devices, or price book devices on allocation require sixty-five (65) days' notice.

- Customers and authorized distributors on EDI for change orders and cancellations may be authorized to reduce the above notification requirements by five (5) days.

### **RETURNS**

The customer must obtain advance authorization for the return of any product from the responsible ON Semiconductor Salesperson or Authorized Distributor. At the time such authorization is granted, the customer will be informed of the return procedure to be followed. In all cases, such products are to be returned FOB destination, normally by parcel post. Any replacement by the Company will also be FOB destination, normally by parcel post.

Product must be properly packaged in ON Semiconductor containers to be in saleable condition and to prevent electrical and mechanical damage. Except as noted below no returns will be accepted, unless the device is packaged in complete original primary containers. For devices shipped in the sealed "drypack" desiccant bags, no returns will be accepted unless the original factory seal is unbroken and the bag is intact. Tape and reel devices must be on ON Semiconductor reels and must have the original seal and lead tape intact. There must be no writing or marking on any labels.

Note: These requirements do not apply to quality returns (including distributor returns for date code expiration).

EpiBase, Epicap, MDTL, MECL, MHTL, MTTL, Multi-Pak, Surmetic, SWITCHMODE, Thermopad, and Uniwatt are trademarks of Semiconductor Components Industries, LLC.

# USING COMPUTER SORT

## FINDING DEVICES EASILY IN THIS PRICE BOOK

As indicated on the front cover of this Price Book all devices listed are in “Computer Sort”.

All devices listed in this book follow a 39 character alphabet. This “new” alphabet starts with a period, a dash and a slash (. - /), followed by the 26 letter alphabet (A thru Z), which is then followed by 10 numbers (0 thru 9).

The ranking or hierarchy of this 39 character alphabet is as follows:

. - / A B C D E F G H I J K L M N O P Q R S T U V W X Y Z 0 1 2 3 4 5 6 7 8 9

Therefore, if you are looking for a device starting with a letter of the alphabet like an MC1741CP, it would appear before a device starting with a number, such as 2N1132.

### TO FIND A DEVICE IN THIS PRICE BOOK:

Start with the first character of the device and find that section of the price book that corresponds to this character (i.e. a Slash (/), an “M” or a “2”); next move to the second character in the device number, and move to that character within the same portion of the listing; and so on until the device number is found. In other words it is used just like a dictionary, character by character.

### EXAMPLE:

To find the 2N6837, go to that section of the listing that begins with the Number “2” (Notice that the section follows all devices that begin with a letter of the alphabet or “1”). Next, find that portion of the listing that begins with “2N” (Notice it follows those devices that begin with “2K”). Next, find that portion of the listing that begins with “2N6”. (Notice it follows those devices that begin with “2N5”.) Continue looking for those portions that begin with the next consecutive character until you have found the entire number.

### IMPORTANT

Because of the way “computer sort” works it is not necessary to be concerned with the absolute value or number of characters in a part number, just move across the device part number, left to right, one character at a time until you find the number.
