	ata	(in mm)	work nearly a	te beads BLM series is desi s a resistor at noise frequer reduces the possibility of re	ncies,
Applications			leaves signal wave forms undistorted. BLM series is effective in circuits without stable ground lines because BLM series does not need a connection to ground.		
er Usage	For general		BLM_B series can minimize attenuation of the signal waveform due to its sharp impedance characteristics. Various impedances are available to match signal frequency.		

The nickel barrier structure of the external electrodes provides excellent solder heat resistance.
