*Including Advanced Options for Distribution
of DMX 512 and CAT 5E Ethernet*

LEX
PRODUCTS CORP.

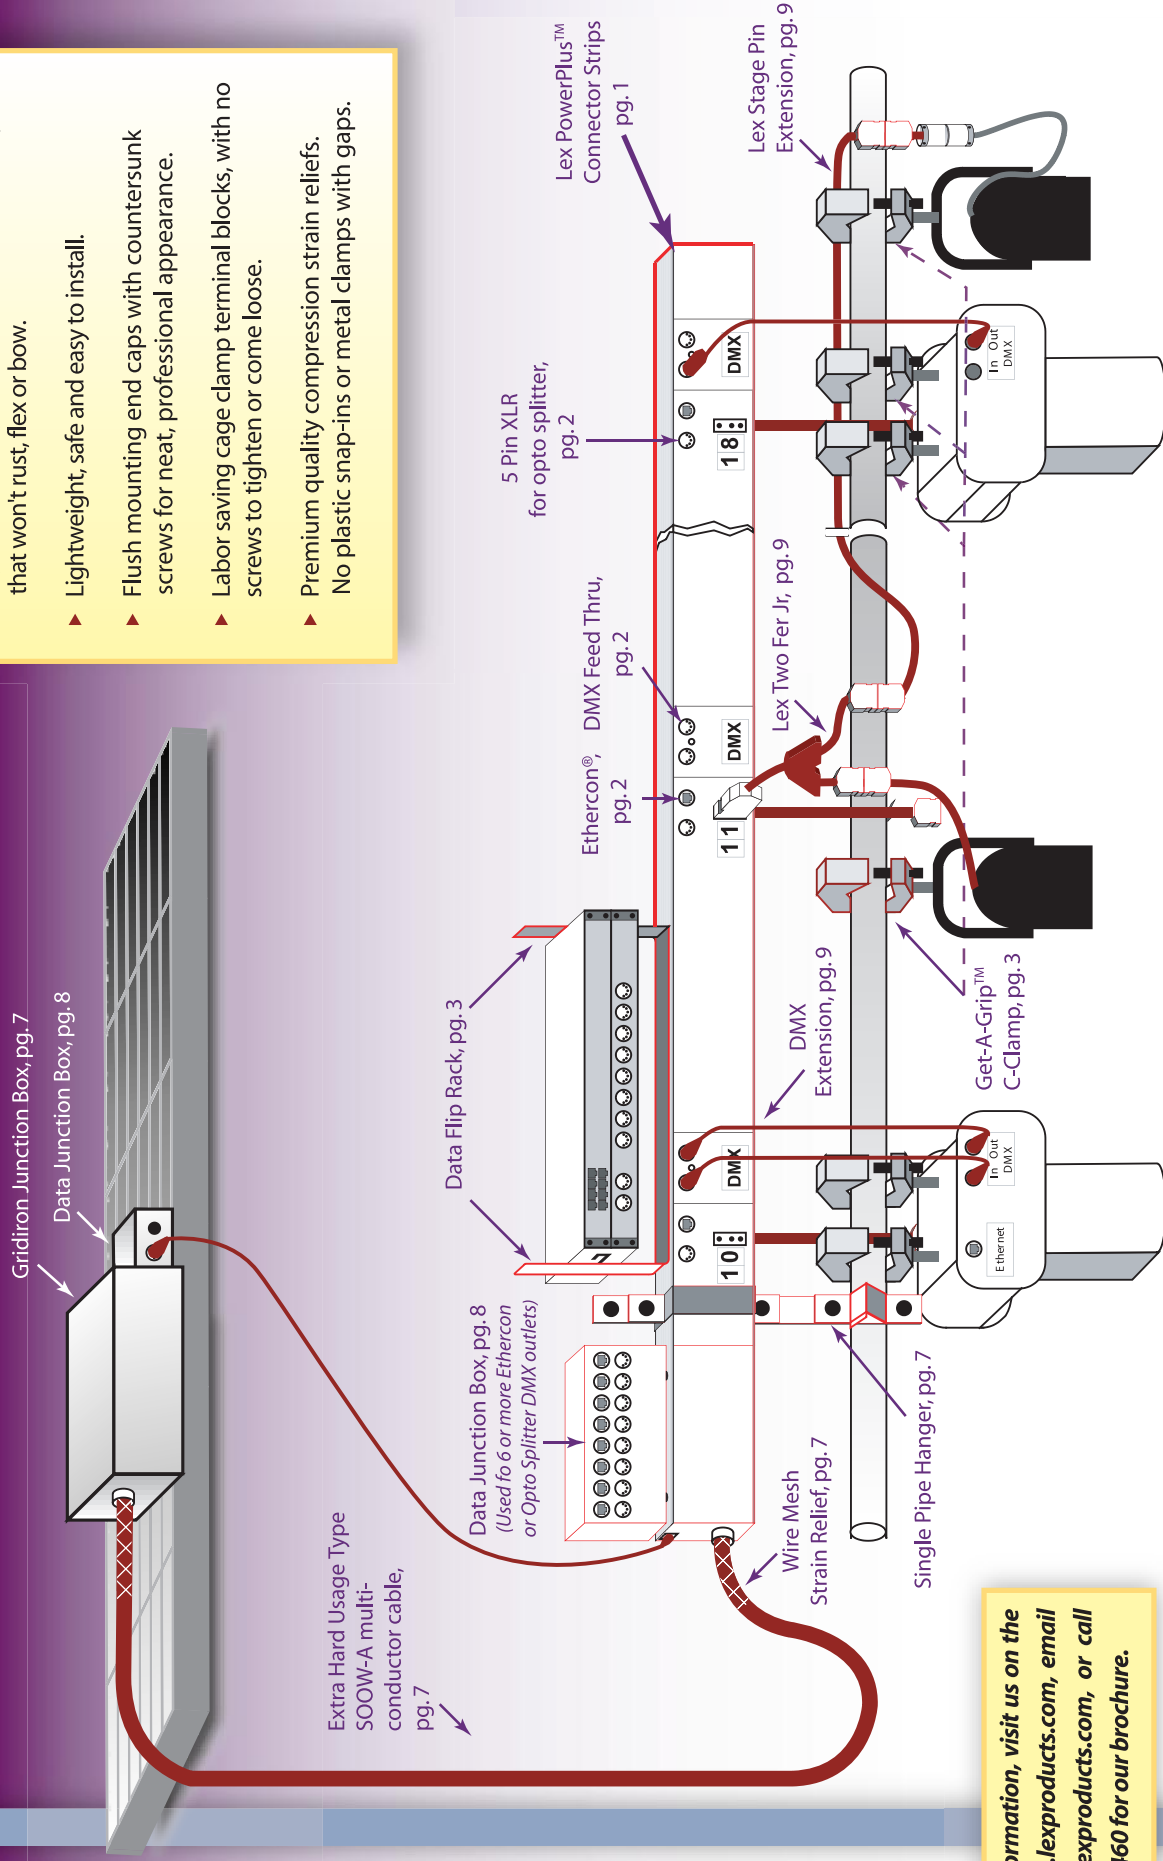

We Deliver the PowerTM

Safe,
Convenient
Power and
Data Access
for
Theatre and
Studio
Applications

The PowerPlus™ Connector Strips offer the most advanced options for distribution of DMX512 and Cat5E ethernet to accommodate today's advanced equipment.

- ▶ Rigid interlocking extruded aluminum wireway that won't rust, flex or bow.
- ▶ Lightweight, safe and easy to install.
- ▶ Flush mounting end caps with countersunk screws for neat, professional appearance.
- ▶ Labor saving cage clamp terminal blocks, with no screws to tighten or come loose.
- ▶ Premium quality compression strain reliefs. No plastic snap-ins or metal clamps with gaps.

For more information, visit us on the web at www.lexproducts.com, email us at info@lexproducts.com, or call 1-800-643-4460 for our brochure.

PowerPlus™ Connector Strips

Enclosed electrical wireways designed to provide electrical and data outlets where needed above or around a stage.

DMX Daisy Chain wiring with feed thru switch.

Construction

- 0.125" black enamel finish extruded aluminum wireway with interlocking cover sections
- 20' or longer connector strips combine multiple 10' sections with a mechanical junction sleeve
- Circuits are identified with 2" white die cut labels
- L.E.D. indicator lights are available
- When DMX or Ethernet outlets are provided a separate metal channel separates power and data wiring
- Approved for stage/studio use in the US and Canada

Power Outlet Options

Following types of power outlets may be specified:

Outlet Type	Description
2PGFL	20 Amp flush stage pin receptacle
2PGPT*	20 Amp stage pin 18" pigtail (12/3 S00W-A portable cord)
515	15 Amp flush straight black receptacle (12/3 S00W-A portable cord)
5-15PT*	15 Amp flush straight blade 18" pigtail
L520R	20 Amp flush locking receptacle
L520PT*	20 Amp locking 18" pigtail (12/3 S00W-A portable cord)
L620R	20 Amp 220 VAC flush locking receptacle
L620PT*	20 Amp 220 VAC locking 18" pigtail (12/3 S00W-A portable cord)
602PGFL	60 Amp flush stage pin receptacle
602PGPT*	60 Amp stage pin 18" pigtail (4/3 S00W-A portable cord)

* add suffix M for wire mesh support grip

Power Input Options

- For 6 or less circuits, a cage clamp terminal block is located inside the connector strip. The power input conductors are connected to the terminal block.
- For 7 or more circuits, a separate junction box is provided to house the terminal block and wiring.
- 19 Pin panel mount LSC connectors (Socapex® compatible) can be provided as the power input eliminating the need for installer wiring. Each 19 pin connector delivers (6) 20 Amp circuits (per NEC table 520-544).

Dimensions	Wireway	Junction Box
Height (Top to Bottom)	4-5/8"	7-1/2"
Depth (Front to Back)	3-3/16"	3-3/16"
Length (End to End)	per appl.	per appl.
Weight	6 lbs./ft. typical	

Data Wiring Options

Lex Products offers the following options for data wiring. Contact us if another method is desired. Data flip 19" rack is sold separately (see page 3).

DMX Daisy-Chain (Order Code DMX DC)

DMX for use with Opto-Splitter (Order Code DMX OS)

Star Ethernet Ethercon® (Heavy duty shrouded RJ45) (Order code SEE)

PowerPlus™ Connector Strip Mounting Brackets

Additional mounting options are available on request. Contact factory with requirements.

Data Flip 19" 2U Rack

PowerPlus™ Connector Strip Ordering Information

YOUR APPLICATION	CATEGORY	Length in feet	Quantity of outlets	Outlet type	Number of circuits	Spacing between outlets	Circuit numbering	Indicator lights	Data options	Mounting hardware	Terminal feed end
	NOTES			Select from page 1	Insert number for each outlet type. Separate outlet types with parenthesis	Insert SE for even or submit separate sheet	N= numbered left to right S= Symmetrical	If desired enter letter I	Insert code from page 2	SP for single pipe DP for double pipe	L =Left C =Center R =Right <small>(as you face the front panel of the connector strip)</small>
	EXAMPLE	30	16 4	2PGFL 520R	16 1	SE	S	I	DMXDC	SP	L

Separate outlet groups (Quantity, Type and Number of Circuits) with parenthesis.

Example: 30 (162PGFLI6) (4520R1) SES1DMXDCSLL is 30' long with 16 flush stage pin outlets on individual circuits. 4 20 Amp straight blade outlets on one circuit, even spacings symmetrical circuit ID, indicator lights, DMX daisy chain wiring, single pipe mounting brackets and terminals to the left.

Specifications

- The PowerPlus™ Connector Strip shall be an extruded 0.125" aluminum wireway with interlocking cover sections for strength with length specified as per job requirements. Dimensions shall be 4-5/8" high x 3-3/16" deep.
- The PowerPlus™ Connector Strip shall have a baked enamel paint finish in black, with outlets identified by 2" white die-cut labels.
- Terminal blocks shall be DIN rail mounted screwless "cage clamp" type. The terminal compartment for six circuits or less shall be in the wireway itself with a removable access panel. A code gauge steel welded junction box shall be provided for seven circuits or more.
- The PowerPlus™ Connector Strip shall accommodate cUL^{us} Listed outlets ranging from 20-100 Amps, 240VAC maximum. Outlets may be flush mounted to the cover or on 18" 12/3 S00W-A extra hard usage pigtailed. Wire mesh grips shall be available for the pigtailed as an option.
- The PowerPlus™ Connector Strip shall accommodate DMX512 Daisy Chain, DMX512 for Opto Splitter or 10 base T ethernet wiring. Data wiring shall be separated from power wiring with a metal barrier. DMX512 wiring shall have Neutrik® Black/Gold input and output connectors. Ethernet wiring shall have Neutric Ethercon® extra heavy duty shrouded jacks.
- The PowerPlus™ Connector Strip shall be supplied with hanging hardware (cat. #541S) to accommodate a single 2" maximum O.D. pipe. One hanger shall be provided for each 5'-0" of strip length. Hanging hardware (cat. #541D) to accommodate two 2" max O.D. pipes may be provided as an option.
- The PowerPlus™ Connector Strip shall be cUL^{us} Listed for use in the United States and Canada.

Outlet Boxes

Standard enclosure sizes for up to 6 outlets offering surface, flush or pipe mounting.

Construction

- 0.125" black enamel finish aluminum with interlocking cover sections
- Circuits identified with 2" white die cut labels
- LED indicator lights are available
- cULus Listed and labeled

Power Input Options

- Cage Clamp terminal block, or
- 19 pin panel mount LSC connector for 6 circuit applications (Max 20 amp per circuit per NEC table 520-44)

Power Outlet Options

20-60 amp stage pin or NEMA wiring devices. Flush mount, 18" pigtail or 18" pigtail with wire mesh grip. See connector strip section for ordering codes (page 1).

6 outlet box with LSC pin connector input.

Dimensions

	Surface Mount	Pipe Mount	Flush Mount
Box

5-6 outlets	16"	16"	16-21/32"

Mounting Options

Order Code	Description
BBP	Brackets and U Bolts for mounting below pipe
BAP	Brackets and U Bolts for mounting above pipe
FL	Flush mount A 21/32" flange is provided around the perimeter of the box
SM	Surface mount. Holes can be drilled where needed in the enclosure for surface mounting
CC	C-Clamps provided for pipe mount applications

Outlet Box Ordering Information

CATEGORY	Quantity of outlets	Outlet type	Number of circuits	Circuit numbering	Indicator lights	Mounting type
NOTES	Maximum six outlets	Insert order code from page 1		Insert actual numbers	If desired enter letter I	Insert order code from previous page
EXAMPLE	4	2PGPTM	4	1234	I	PB
YOUR APPLICATION						

Example: 42PGPTM41234IPB is a 12" x 4-5/8" x 3-3/16" wide box with (4) 20A stage pin 18" pigtails with wire mesh, on individual circuits numbered 1 through 4 with indicator lights supplied. Hung with single pipe brackets and U-bolts.

Outlet Box Specifications:

The outlet box shall be a  listed wireway constructed of 0.125" black enamel finish aluminum with interlocking cover sections. The exterior dimensions of the wireway shall be 4-5/8" high x 3-3/16" deep by 6" wide for up to 2 outlets, 12" wide for 3 or 4 outlets, 16" wide for 5 or 6 outlets.

Receptacles shall be flush mounted to the cover or attached to 18" 12/3 SOOW-A pigtails (drop cords) or both. Pigtails shall be supported by compression type strain relief fittings mounted to the bottom surface. Wire mesh support grips shall be available for arc of bend relief as an option.

The outlet boxes shall be available in four mounting configurations:

- Surface mount
- Pipe mount with brackets and U-bolts
- Pipe mount with C-Clamps, and
- Flush (recessed) mount.

Boxes shall be capable of being converted to each mounting type in the field by exchanging accessories at the installation location using only common hand tools. Flush mount covers shall be provided with a 21/32" flange around the perimeter.

Grid Junction Boxes and Accessories

Grid Junction Boxes are the interface between building conduit and multi conductor cables that feed connector strips or outlet boxes. They are typically mounted to grids above the stage or surface mounted to walls.

Dimensions & Circuitry:

	Cat.# 6610J-1	Cat.# 6610J-2	Cat.# 6610J-3	Cat.# 6610J-4
Terminals	24	48	72	96
Height	7.5"	7.5"	7.5"	7.5"
Depth	3"	3"	3"	3"
Width	10"	18"	26"	34"
Circuits	1-12	13-24	25-36	37-48

Specifications:

The junction box shall be an  Listed wireway constructed of 16 gauge welded steel. The exterior dimensions of the wireway shall be 7-1/2" high x 3" deep, with the width being dependent upon the number of circuits specified.

The junction box shall include a removable steel cover to allow access to the wiring and cage clamp terminals. The proper number of terminals shall be provided to allow the installation of separate hot and neutral conductors for each electrical circuit. Terminal blocks shall be non loosening, cage clamp style. Separate lugs shall be provided for terminating any grounding conductor.

All painted surfaces shall be baked enamel.

Multi-Conductor Portable Cords & Strain Reliefs UL Listed CSA Certified

Extra Hard Usage Type S00W-A
Portable Cord as required in theatrical
applications by NEC Article 520.

Data Outlet System

- A flexible, economical system for interfacing between building wiring and patch cables.
- Allows surface, flush or pipe mounting of data outlets.

Step One

Select the insert or combination of inserts that gives you the data outlets you require.

Step Two

Select the faceplates based on the number of inserts. (For one insert select a one gang plate, etc.)

Step Three

Select the surface, flush or pipe mount back box for the installation.

Surface mount

Pipe mount

Cat. no.	Inserts Description
I5XERM	Male 5 pin XLR
I5XF	Female 5 pin XLR
I5XMF	One Male and one Female 5 pin XLR
I5XMM	Two Male 5 pin XLR
I5XFF	Two Female 5 pin XLR
I6XRUF	One Female 6 pin XLR ETC RFU
I6XHHR	One Female 6 pin XLR Strand and Colortran HHR
IRJEC	Neutrik® Ethercon® RJ45 (Extra Heavy Duty Shrouded Connectors)
I3XM	Male 3 pin XLR
I3XF	Female 3 pin XLR
I4XM	Male 4 pin XLR
I4XF	Female 4 pin XLR
IBK	Blank Insert

Face Plates

Cat. No.	Description
WP15	One Gang Face Plate
WP25	Two Gang Face Plate
WP35	Three Gang Face Plate
WP45	Four Gang Face Plate
WP55	Five Gang Face Plate
WP65	Six Gang Face Plate

Standard finish is black. Use suffix SS for stainless steel finish.

Back Boxes

Description	Flush	Surface	Pipe Mount
One gang	BB1F	BB1S	BB1PM
Two gang	BB2F	BB2S	BB2PM
Three gang	BB3F		
Four gang	BB4F	BB4S	BB4PM
Five gang	BB5F		
Six gang	BB6F	BB6S	BB6PM

Surface and pipe mount boxes are not available in 3 or 5 gang.

For 3 gang surface applications use a four gang box and face plate with additional blank insert.

For 5 gang use a 6 gang box and face plate with an additional blank insert.

Cable Assemblies

Lex Products builds every conceivable cable assembly used in entertainment. We've listed the most prevalent used in conjunction with connector strips below. Contact us or visit us on the web to see the full line of Lex cable assemblies.

About Lex Products

3 Phase Power

Just as an efficient electrical system utilizes 3 phases to ensure a smooth uninterrupted flow of power, Lex Products embraces a 3 Phase Philosophy to consistently exceed our customers' expectations.

The First Phase is **INNOVATION** in product design. In evaluating a new or re-designed product, we endeavor to design its features with the newest technology to provide the best, most convenient, time-saving and practical advantages. But our most important goal is for our products to be safer, more convenient and longer-lasting.

The second phase is **QUALITY** of manufacture. Simply put, we are obsessed with the manufactured quality of the products that we build. The components that we utilize must meet strict criteria before going into one of our cable assemblies or power distribution products. And, if we can't find the proper component, we have been known to design and tool-it-up ourselves. At every stage in the manufacturing process, we go through a rigorous testing and inspection process to ensure that the multitude of electrical and control circuitry is intact and in perfect working order. Before the Lex label is ever applied, every component that goes into a Lex Product must meet our standards, or it won't be let out of the shop.

The third phase is **SERVICE**. We built our business by meeting delivery deadlines for the motion picture industry, theater, concerts, and live-events. When a customer calls with a need, we'll do whatever is humanly and physically possible to ensure their success. And don't be surprised if we call to see how your application went. We want to find out if there is anything we can do to improve the product for the future. At Lex, 360° Feedback is not just a buzz word.

So that is the Lex Products Philosophy: **Innovation, Quality** and **Service**. It is this 3-Phased approach that has made our company grow and expand into new and emerging markets, such as the Military, Convention and Industrial sectors. And, it is this approach that will ensure our future growth.
