NOTICE: Specifications are subject to change without notice. Contact your nearest AVX Sales Office for the latest specifications. All statements, information and data given herein are believed to be accurate and reliable, but are presented without guarantee, warranty, or responsibility of any kind, expressed or implied. Statements or suggestions concerning possible use of our products are made without representation or warranty that any such use is free of patent infringement and are not recommendations to infringe any patent. The user should not assume that all safety measures are indicated or that other measures may not be required. Specifications are typical and may not apply to all applications.

Elco is approved by B.S.I. to B.S.E.N. ISO 9001 to manufacture a broad line of popular IDC connector configurations for a wide variety of applications:

- Telecommunications
- Computers & Peripherals
- Consumer & Business/Office Equipment
- Robotics
- Terminals
- Appliances
- Automotive Electronics
- Military & Aerospace Equipment

BENEFITS OF FLAT CABLE MASS TERMINATION

- Space efficient and easy to route in tight enclosures
- Easy, fast and reliable termination, with controlled centerline spacing
- Reliable coplanarity provides accurate spacing from #1 to last conductor
- No need for wire stripping, prepping or soldering
- Operators easily trained, to achieve minimal error or variability

And any other cable-to-board, board-to-board and cable-to-cable interface on 0.050" - (1.27mm) and 0.100" (2.54mm) spacing!

COMPATIBILITY & APPROVALS

- UL
- CSA
- Intermateable and interchangeable with many other manufacturers
- Compatible with MIL-83503 product

ADVANCED DESIGN & QUALITY

- Contact design pierces the cable insulation, providing a reliable gas-tight termination, with positive electrical characteristics
- Contacts accommodate solid or stranded wire
- Single beam contact face makes early contact with mating pin to give maximum contact wipe
- Industry-standard P.C.B. footprints provide easy circuit routing and efficient use of board real estate
- Popular header variations, such as press-fit, straight (vertical) and right-angle (horizontal) through-hole, for a variety of board thicknesses
- Headers in 4-wall configurations for pin protection

A FULL RANGE OF FEATURES AND ACCESSORIES

- Lock & ejects that can accommodate sockets with or without strain relief mechanisms, to avoid stressing cable terminations
- Feed-through or closed-end sockets accommodate daisy chain or cable-end applications
- Ridged covers and marked #1 contact positions that provide accurate cable to contact alignment
- S.M.T. header styles molded in high thermal resistant material
- IDC connectors are available in packaging designed for automated cable or P.C.B. assembly

IDC HARNESSSES

Elco provides custom harness design and manufacturing expertise across a broad range of applications including telecommunications, computing, industrial processing and automotive.

Elco works closely with major manufacturers not just as a supplier of IDC connectors and cable assemblies but as a partner with its own design team working with the customer to solve interconnect problems.

Harness design and manufacture is a strategic growth area for Elco.

CABLE HARNESSING ASSEMBLY SERVICE

The Company now has the in-house capability to produce IDC cable assemblies for the high volume personal computer and telecommunications market and the market for process instrumentation. Other examples of harnesses are built around the advanced range of VARICON™ connector systems using crimp and solder discrete wiring techniques.

Design of connectors and harnesses are drafted in house using the latest range of CAD equipment.

The Company's quality management system is approved by QS 9000, ensuring optimum reliability.

The Customer profile for cable harnesses substantiates Elco's reputation for total commitment to quality, service and value. The Company's team of interconnection specialists provide Customers with the optimum, most cost-effective interconnection solution.

Card Edge Connector

Series 6338

UL Approved File No. E90732.

CSA Approved File No. 1255749.

10, 16, 20, 26, 34, 40, 44, 50 & 60 positions.

Copper alloy contacts.

Accepts printed circuit boards of 1.6mm thickness.

Compatible with other leading manufacturers.

TECHNICAL SPECIFICATION

Material:

Molding - UL94VO rated glass filled grey polyester

Contact - Phosphor bronze

Contact Plating:

Contacts are selective gold-plated over nickel, reflow tin lead on IDC section

Current Rating:

1 ampere at 70°C maximum ambient

Working Voltage:

350V DC or AC peak

Insulation Resistance:

>1000 megohms

Voltage Proof:

1050 DC or AC peak

Operating Temperature:

-55°C to +105°C

Wire Gauge:

26 AWG Solid & Stranded
28 AWG Solid & Stranded

Ejector Style Header

Series 8289

Available in industry standard sizes of 10-64 positions, they mate to Elco Series 8290 IDC sockets, as well as other industry compatible connectors. Solder or press-fit contacts are available in either straight or right angle formats. The four wall design and optional molded in polarizing keys ensure positive polarization without pin loss. Latch/eject levers can also be specified to suit the mating Series 8290 socket, either with or without strain relief. Stand-off are incorporated to facilitate flux washing and de-gassing.

TECHNICAL SPECIFICATION

Material:

Molding - UL94VO rated glass filled grey polyester

Contact - Phosphor bronze

Contact Plating:

Low Profile IDC Socket Connector

Series 8290

Available in industry standard sizes of 10-64 positions. They mate to Elco Series 8289, 8293, 8380 and 8383 headers, as well as other industry compatible connectors. An optional strain relief, which can be easily fitted, eliminates stress on the cable. An in-contact polarizing key is available to ensure positive polarization. Contacts are copper alloy for added reliability, and are designed to mate to 0.024" (0.60mm) to 0.025" (0.64mm) square pins. The contact design facilitates maximum wipe on the header pins. (early mate, late break).

TECHNICAL SPECIFICATION

Material:

Molding - UL94VO rated glass filled grey polyester

Contact - Phosphor bronze

Contact Plating:

Contacts are selective gold-plated over nickel, reflow tin lead on IDC section

Current Rating:

1 ampere at 70°C maximum ambient

Voltage Rating:

350V DC or AC peak

Dielectric Withstanding Voltage:

1050V DC or AC peak

Insulation Resistance:

>1000 megohms

Transition Connector

Series 8292

Transition connectors are available in industry standard sizes of 10-60 positions. This IDC connector provides a fast, permanent, and economical termination of ribbon cable to PC boards. It can be used as either a daisy chain or end type termination connector. Pin lengths are available to suit 0.063" (1.6mm) or 0.126" (3.2mm) PC boards. Designed to accommodate the industry standard 4 row PC Board hold pattern, the connector also incorporates standoffs which enable efficient flux washing and de-gassing to take place.

TECHNICAL SPECIFICATION

Male Plug Connector

Series 8293

Series 8293 IDC male plug connectors are available in industry standard sizes of 10 to 64 positions. They mate with Series 8290 IDC sockets as well as other industry compatible connectors. The housing gives full protection to contact pins, and has the optional facility of fitting dual height polarizing keys to prevent incorrect insertion of the mating socket.

TECHNICAL SPECIFICATION

Material:
Molding - UL94VO rated glass filled grey polyester
Contact - Phosphor bronze

Contact Plating:
Gold over nickel

Current Rating:
1 ampere at 70°C maximum ambient

Voltage Rating:
350V DC or AC peak

Insulation Resistance:
>1000 megohms

Dielectric Withstanding Voltage:
1050 DC or AC peak

UL and CSA Approval pending

Operating Temperature:
-55°C to +105°C

Contact Resistance:
Initially, 10 milliohms max.

Low Profile Box Header

Series 8380

Low profile box headers are available in industry standard sizes of 10-64 positions. They mate to Elco Series 8290 IDC sockets, as well as other industry compatible connectors. Both straight and right angle solder dip pins for PC boards are available together with straight press-fit versions. The connector is shrouded on all four sides for polarization and contact protection. Polarizing keys are molded in for correct socket alignment with contact loss.

TOGGLE PRESS

The Elco toggle press is capable of terminating 125 connectors per hour. The press features long horned guides for the ram which provides precise alignment. The press is fitted with a return mechanism allowing the return of the ram to its starting position after its entire extension. An offset hand lever permits good operator visibility of the work. A micro-meter attachment to the ram is factory set. The range of platens for the toggle press is identical to those for the pneumatic press, thereby allowing the use of existing tooling when upgrading to a pneumatic press.

PNEUMATIC PRESS

The Elco pneumatic press is a compact, high precision press providing a fast and accurate method of terminating IDC connectors. The press is capable of terminating 250 connectors per hour and a precision slide table allows all parts to be loaded outside the termination area. The press features service-free bearings and guides. Low maintenance and a favorable noise level of less than 75 dBA. The ram incorporates a micrometer adjustment which is factory set.

A range of platens is available to suit each series of IDC connectors.

Under certain terms, arrangements exist for this press to be leased or loaned by customers. Please consult our sales representative for further information and outright purchase price.
