Width	0.75 Inch
Width (Metric)	19

Details

- The combination of the pressure-sensitive, rubber-resin adhesive and the PVC backing offers electrical and mechanical protection

- Provides high resistance to UV rays, abrasion, moisture, alkalis, acids, corrosion and varying weather conditions

- Compatible with rubber and synthetic splicing compounds

- Tape measures 3/4 in x 44 ft x 7 mil

- Withstands a temperature range of 0 to 221 degrees F (-18 to 105 degrees C)

- UL Listed, ASTM Approved, CSA Certified and RoHS 2011/65/EU Compliant

- 10 rolls/carton, 100 rolls/case

Scotch® Super 33+™ Tape is a 7-mil thick, premium-grade, all-weather, vinyl electrical tape that is designed to provide electrical insulation for cable splices up to 600V. The flame-retardant tape withstands a temperature range of 0 to 221 degrees F (-18 to 105 degrees C).

Scotch® Super 33+ Electrical Tape a black, 7 mil tape, on a 1 inch core, combines the flexibility of a PVC backing with excellent electrical insulating properties to provide primary electrical insulation for splices up to 600V. Abrasion-, corrosion-, and UV-resistant, it makes an excellent protective jacketing for high-voltage cables and wire harnessing. UL Listed and CSA Certified, it resists alkalis and acids, and is flame-retardant. Excellent all-weather performance in cold to 0°F (-18°C) or hot to 220°F (105°C).

Best Automotive Tape

I needed to make a wiring harness for my project car. I protected the wire with plastic wire loom and used 3m 33+ tape to wrap around it every few inches. Looks better than factory! I might redo some of the factory wiring harnesses with this tape. Its exceptional and will stand up in an engine bay through summer and winter for years.

Good stuff

All pupose go to electrical tape. I don't buy junk tape and this certainly isn't. It's one of the many good quality scotch/3m tapes that I trust .

best I've used.

33, and 88 are the only vinyl tape I buy, and prefer to use. I am a retired construction electrician, and still look for those if buying tape. Thank you. Ken

Nothing better

As an electrician I use 33 almost everyday. I've used other brands and styles before but nothing compares at all. It stays flexible and sticky in the cold. It stretches and flexes to make nice tight wraps when pulling wire. If I open older electrical boxes that have grouped wires or taped connectors for added protection, I can usually tell if it was 33 mainly because its still on there because it doesn't dry out.

THE one to use!

33 works. Plain and simple. It's a fantastic all-purpose electrical tape. It's great in the toughest conditions: heat, oil, moisture, dirt. Holds up and doesn't get brittle or gooey. Use it every single day in a paper mill environment and I won't use anything else.

Is there any other tape?

I have used this tape longer than I can remember, prefer 3M over any other

Great tape!!

33+ holds better and last longer, compared to other Electrical tape.
