PCN # 20031704

DESIGN/PROCESS CHANGE NOTIFICATION -- FINAL

Please refer to Forecast PCN# 20031203.

This is to inform you that a design and/or process change will be made to the following product(s). This notification is for your information and concurrence.

If you require data or samples to qualify this change, please contact **Fairchild Semiconductor within 30 days of receipt of this notification.**

If you have any questions concerning this change, please contact:

Name: KIM, HOHYUN

E-Mail: HOHYUN.KIM@notes.fairchildsemi.com

Phone: 82-32-680-1313

PCN Originator

Name: Pepito, Monaliza B.

Phone: 63-32-3415636

PCN Type: Die Shrink

Effectivity

Expected 1st Device Shipment Date: 4/23/2004

Earliest Year/Work Week of Changed Product: 0417

(Note: Package marking may differ from this format)

Product ID (Description):

This change will affect all 6.8 - 20 V zener devices in DO-41 and DO-35 packages.

Description of Change:

Fairchild is in the process of qualifying Torex's shrunk zener die, from 0.45mm x 0.45mm to 0.35mm x 0.35mm, for the voltage range of 6.8V to 20V. The shrunk die will completely replace the existing large die. There will be no change in Fab and Assembly sites. Fairchild Semiconductor zeners in DO-35 and DO-41 packages will still be sourced from Torex International Inc. and assembled in one of its subcontracting plants, Takcheong Electronics, located in Shanwei, Guandong, China.

Effect of Change:

There is no change in the product performance to the specification limits. Parts covered in this change are expected to have comparable performance with the current parts in terms of quality and reliability.

Qualification:

The qualification plan is intended to meet all the requirements outlined for shrunk die qualification and the overall quality and reliability of our products.

Conclusion

Based on favorable reliability test result, product change is now qualified for full production.
